-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Priority

Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-9 are rejected under 35 U.S.C. 102(e) as being anticipated by U. S. Pat. 7,019,208 B2 to Delahoy.

Col. 3 lns. 48-55 in the Delahoy patent sets forth that the subject of his invention concerns the use of sulfur in improving the performance of CIGS devices (i. e. Cu(In,Ga)Se₂ devices: please also see col. 1 ln. 27). Col. 5 lns. 14-18 reports that in most of the experiments using elemental sulfur, the sulfur was weighed, and both the ZIS and S were placed in the same boat or crucible. In this case, as the crucible was heated the sulfur fully evaporated from the crucible. Col. 8 lns. 60-65 sets forth that although identification of the mechanism by which evaporation of the sulfur prior to deposition of the ZIS improves the solar cell is not needed to support the invention,

nevertheless it is believed that reaction of the S with the CIGS possibly passivates defect states.

Reference Made of Record

U. S. Pat. 6,488,770 B1 disclosing monocrystalline powders and monograin membrane production is made of record.
